Voted 2008 – 2017 Best Places to Work by CareerSource Polk

This position is responsible for, but not limited to:

The Environmental Engineer will work under the direction of the Senior Environmental Engineer on a variety of environmental and/or engineering projects for our organization. They work with A-C-T staff and resources from within their group and other A-C-T business groups to ensure their environmental projects meet all requirements set by regulatory agencies, clients and A-C-T.

Key Responsibilities / Essential Functions

- Assist with the design of remedial treatment systems.
- Assist with treatment system installation, O&M, inspections, testing, and troubleshooting.
- Conduct field work, including construction oversight, remedial system operation and maintenance, sampling, drilling, well installation, remedial pilot tests.
- Assist in system performance monitoring.
- Compile and evaluate data and assist in report preparation.
- Prepare environmental compliance plans, permits, and reports for air quality, hazardous waste, spill prevention, storm water, and wastewater.
- Perform Phase I and II Environmental Site Assessments to support property transfer transactions.
- Assist in ensuring compliance with all federal, state and local regulations.
- Work within quality/budget/schedule expectations and scope-specific assignments.
- Communicate with subcontractors, regulatory agents, tenants, and clients during field activities.
- Commitment to customer service, including managing difficult or emotional customer situations; responding promptly to customer needs; soliciting customer feedback to improve service; responding to requests for service and assistance.
- Upholds the ethics and values of the company. Other responsibilities as necessary

Education and/or Required Experience

- BS in chemical, civil, environmental, or mechanical engineering and/or related degree.
- Minimum 3.0 GPA.

Additional Qualifications

- 3 to 5 years of environmental consulting and design experience to support projects involving site investigations, remediation, regulatory compliance and environmental permitting for groundwater, soil, soil vapor, air and regulated waste.
- Project or technical management of site investigation/remediation including conducting feasibility studies, evaluation of remedial technologies, design and implementation of in-situ and ex-situ remedial approaches, oversight of operations and maintenance of remediation equipment/installations, remedial system design specification compliance and optimization, facility compliance evaluations, emissions calculations, regulatory applicability reviews (review/interpretation of environmental regulations) field data collection and interpretation, permit preparation, and completion of reports.
- Working knowledge of the Resource Conservation and Recovery Act program, the Clean Water Act, Clean Air Act, Petroleum Restoration Program and familiarity of the Florida Department of Environmental Protection regulations.

- Knowledge of principles and practices of administration and supervision and applicable laws, codes, regulations, policies, and procedures.
- OSHA 40-hr HAZWOPER training preferred.
- Must work well both alone and in team settings.
- Able to manage multitask work in a fast-paced environment.
- Willingness to work additional hours in order to meet job requirements.
- Upholds the ethics and values of the company.
- Ability to travel, including some overnight.
- Pre-employment drug screen according to A-C-T's Drug Free Workplace policy.
- Acceptable driving record in accordance with A-C-T's Insurance & Driving policy.
- Satisfactory background check.

Our Team Members enjoy:

- Competitive Salary
- Training
- Medical, Dental & Vision Insurance
- Life Insurance
- Short-Term Disability Insurance
- Supplemental insurance options including Long-Term Disability
